### Customer Problem Statement:

I am an online shopper who values speed, simplicity, and reliable service. I'm trying to find and purchase products quickly and easily through ShopEZ. But I often face challenges such as unclear product information, lack of trust in payment security, and concerns about delivery timing. Because some eCommerce platforms provide inconsistent user experiences, offer limited discounts, and don't ensure transparent tracking or privacy protection. Which makes me feel anxious, cautious, and hesitant to complete my purchases confidently.
